IN THE SPECIFICATION

Please make the following revisions to the cited specification paragraphs:

[21] Referring to Figure 3, the latch bracket 32 includes structural ribs 56 that reinforce the latch bracket 32. The structural ribs ~~57~~ ~~56~~ are generally in a perpendicularly intersecting arrangement. The latch bracket ~~32~~ ~~62~~ includes an extended support arm 36 that attaches by a snap-fit portion 58 to the door latch (Figure 2). The structural rib 60 includes a generally U-shaped channel 62 that receives the PIC cable 50. A tab 64 protrudes from the structural rib 66 over the channel 62 to retain the PIC cable 50 in the channel 62. The tab 64 is preferably flexible to deflect and allow insertion of the PIC cable 50 into the channel 62.
